

PRELIMINARY PROGRAM

ECCN
11th edition
2023

EUROPEAN
CONFERENCE ON
CLINICAL
NEUROIMAGING

Session 1: Emerging biomarkers in neurodegenerative diseases

- Clinical use of TAU PET: are we ready?
- Plasma screening: a game changer for diagnostic algorithms
- Tau biomarkers in Alzheimer's disease: towards implementation in clinical trials

Session 2: Imaging Prodromal stages of Lewy body diseases

- α -Synuclein Radiotracer Development
- Imaging Biomarkers of conversion in idiopathic rapid-eye-movement sleep behaviour disorders
- Multi-Modal Imaging Studies of Brain and GUT interactions in Parkinson disease

Session 3: Brain tumors & Neuroinflammation

- Investigational PET tracers in neuro-oncology: present and future
- TSPO imaging in brain tumors
- TSPO imaging in neurodegenerative diseases

Session 4: White matter Imaging in neurodegenerative diseases and beyond

- White matter microstructure disruption in early stage amyloid pathology: is there a role for PET imaging?
- MRI imaging of white matter involvement in Alzheimer's Disease
- Amyloid and TPSO PET imaging in multiple sclerosis
